

Press Release Regarding County RX Card Prescription Drug Card

Residents facing government spending cuts on state-sponsored healthcare programs can get help to save money on their prescription medications through www.CountyRxCard.com and www.PatientAssistance.com.

CountyRxCard.com is a free prescription drug card program being produced to help all Americans cut their prescription drug costs. Individuals can receive savings of up to 75% at more than 50,000 national, regional, and local pharmacies by picking up a **free** prescription drug card in the County Court office in the Courthouse or by downloading a card themselves at www.countyrxc.com. There are no deductibles, no waiting periods, and no pre-existing exclusions with the use of the card.

PatientAssistance.com features a database of over 1000 patient assistance programs, programs offered by the drug companies themselves to help the underinsured afford the medications they need. The service is completely free, and allows patients to browse for programs by drug company or medication name. PatientAssistance.com even puts enrollment forms in the hands of patients, and helps them manage their program enrollment applications.

"American families are hurting enough already," says the President of CountyRxCard.com and PatientAssistance.com, Rex Bowden Jr. "They already have to worry about the stress of losing jobs or having their work hours reduced. They're already struggling to avoid foreclosures on their homes. And now half of our state governments can't afford to maintain public healthcare programs for the poor. We believe the best thing anyone can do right now is to be proactive about their healthcare options. That's why we put resources into the public's hands to help them get the medications they need at prices they can afford."
